**INTERNATIONAL JOURNAL OF TERRESTRIAL HEAT FLOW
AND APPLIED GEOTHERMICS**

VOLUME 4, NUMBER 1, APRIL 2021.

EDITORIAL TEAM

Editorial Manager:

Valiya Hamza (Brazil)

Editors:

Andrea Foerster (Germany);
Anne Hofmeister (USA);
Carlos Alexandrino (Brazil);
Fábio Vieira (Brazil);
Guenter Buntebarth (Germany);
Jacek Majorowicz (Canada);
Jorge Gomes (Brazil)
Lev Eppelbaum (Israel);
Massimo Verdoya (Italy);
Mohan Lal Gupta (India);
Raissa Dorofeeva (Russia);
Shaopeng Huang (China).

Layout:

Fábio Vieira (Brazil).

Proof Reading:

Jorge Gomes (Brazil).

Published: April 2021

CONTENTS

EDITORIAL

[Editorial to the fourth issue of “International Journal of Terrestrial Heat Flow and Applied Geothermics”.](#)

Jorge L.S. Gomes, Valiya M. Hamza, Alan Jessop and Massimo Verdoya IV

DATA ANALYSIS AND RESOURCE ASSESSEMNT

[A new data-base structure for the IHFC Global Heat Flow Database.](#)

Sven Fuchs, Graeme Beardsmore, Paolo Chiozzi, Orlando Miguel Espinoza-Ojeda, Gianluca Gola, Will Gosnold, Robert Harris, Sam Jennings, Shaowen Liu, Raquel Negrete-Aranda, Florian Neumann, Ben Norden, Jeffrey Poort, Dušan Rajver, Labani Ray, Maria Richards, Jared Smith, Akiko Tanaka and Massimo Verdoya 1

[Geothermal Sustainability or Heat Mining?](#)

Ladislav Rybach 15

[Reappraisal of Heat Flow Variations in Mainland Africa.](#)

Jorge L.S. Gomes, Fabio P. Vieira and Valiya M. Hamza 26

REGIONAL INVESTIGATIONS

[Low Heat Flow at Shallow Depth Intervals: Case Studies from Belarus.](#)

Vladimir Zui 79

[Geothermal Gradients in the Upper Amazon Basin derived from BHT data.](#)

Diego Barba, Roberto Barragán, Jonathan Gallardo, Andres Ormasa and Alfonso Salguero 85

[Effects of Near-Surface Air Temperature on Sub-Surface Geothermal Gradient and Heat Flow in Bornu-Chad Basin, Nigeria.](#)

Andrew A. Tyoh, Etim D. Uko, Olatunji S. Ayanninuola and Onengiyeofori A. Davies 95

MODEL STUDIES

[Method for estimating the depth of circulation of thermal and non-thermal waters in the upper crust.](#)

Carlos Alexandrino, Fabio P. Vieira and Valiya M. Hamza 103

<u>Numerical Model to Assess the State and Increase of Temperatures in Underground Mine Galleries: A Tool to Support Heat Recovery Projects.</u>	
<i>Vitor Colombo, Maria Lurdes Dinis and José Soeiro de Carvalho</i>	110
CLIMATE CHANGES OF THE RECENT PAST	
<u>Influence of past vegetation changes on estimates of ground surface temperature histories GSTH obtained by inversion of borehole temperature logs: Example from the Western Canadian Sedimentary Basin.</u>	
<i>Jacek Majorowicz1 and Jan Šafanda</i>	119
<u>Short- and long-term variations in groundwater temperature caused by changes in vegetation cover.</u>	
<i>Maria de Fatima Santos Pinheiro, Günther Buntebarth, Andrea Polle and Martin Sauter</i>	127
<u>Land Development and Role of Evapotranspiration in Climate Change.</u>	
<i>Trevor J. Lewis</i>	135
<u>Inversion results appended with estimates from vegetation changes in assessment of Ground Surface Temperatures for the Amazon Region, Brazil.</u>	
<i>Valiya Hamza, Fabio Vieira, Suze Guimaraes and Elizabeth Pimentel</i>	140
MEMORIES OF LATE ALAN BECK	
<u>Memories of Alan Edward Beck (1928–2020).</u>	
<i>Valiya Hamza</i>	148
